**MAIL STOP PETITIONS****IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

In re Applicant: § Conf. No.: 6143

CHING-WU CHU

Filed: March 26, 1987 § Art Unit: 1751

Serial No.: 07/032,041 § Examiner: Mark Kopec

For: SUPERCONDUCTIVITY IN § Docket No.: CIP-81297  
SQUARE-PLANAR COMPOUND  
SYSTEMS § Customer No.: 01200

**PETITION UNDER 37 C.F.R. § 1.183 TO SUSPEND THE RULES**

On January 5, 2006, the issue fee was paid in this patent application, allowing it to proceed to issuance after pending almost 19 years. Subsequent to payment of the issue fee, the University of Houston, Assignee of record of this patent application, was notified by two individuals, Pei-Herng Hor and Ru-Ling Meng, employees of Assignee since prior to the filing date of this application on March 26, 1987, that they claimed co-inventorship of this patent application. Applicant and its Assignee (collectively "Assignee") has a duty to notify the U.S. Patent and Trademark Office of information material to patentability under 37 C.F.R. § 1.56. Assignee has begun a diligent investigation into these claims. At this time, Assignee has not been able to determine if this claim is material to patentability, however, Assignee has filed the Information Disclosure Statement under 37 C.F.R. § 1.97(i) of Exhibit A to assure this information will be placed in the file.

According to Assignee's understanding of 37 C.F.R. § 1.313, the existence of this claim of inventorship does not meet any of the express conditions of § 1.313(c) for withdrawal of this application from issue, including filing of an RCE, which does not apply to patent applications

Serial No. 07/032,041  
Petition to Suspend the Rules

such as this filed before June 8, 1995. A continuation of this application cannot be filed without loss of the entire patent life, also due to the age of the application. Therefore, Assignee petitions the U.S. Patent and Trademark Office under 37 C.F.R. § 1.183 to suspend the rules, (specifically, Assignee requests suspension of 37 C.F.R. § 1.313(c) and any other rules) withdraw this application from issue, and thereafter hold this application in suspension for a period of six months from grant of this Petition. This period of suspension will allow the Assignee sufficient time to complete its investigation to determine whether inventorship of this patent application should be corrected and file for any necessary correction of inventorship under 37 C.F.R. § 1.48.

If during this period of suspension, Assignee files for a correction of inventorship, the Director can remove the suspension to allow examination of this correction of inventorship. If Assignee makes no attempt to correct inventorship during the period of suspension, then the suspension can be removed and the application proceed to issue.

A suspension of rules under § 1.183 is appropriate in "an extraordinary situation" "when justice requires." The unfortunate timing of this claim (made after nearly two decades of pendency and payment of the issue fee) by the alleged co-inventors Pei-Herng Hor and Ru-Ling Meng places the Assignee in an unusual position. As the Director knows, there are limited ways in which an Assignee can correct inventorship, including:

1. During the application stage, under 37 C.F.R. § 1.48, pursuant to 35 U.S.C. § 116;
2. After issuance of the patent, through a certificate under 35 U.S.C. § 256 and 37 C.F.R. § 1.324 from the Director of the U.S. Patent and Trademark Office correcting the error in inventorship;
3. After issuance of the patent, through a reissue proceeding under 35 U.S.C. § 251 in the U.S. Patent and Trademark Office;
4. After issuance of the patent, through a court-ordered correction, with the Director subsequently issuing a certificate accordingly under 35 U.S.C. § 256.

Serial No. 07/032,041  
Petition to Suspend the Rules

Correction of inventorship of a pending application can be made, even if a joint inventor refuses to sign a corrected declaration. However, if correction of inventorship is made to an issued patent under 37 C.F.R. § 1.324, declarations of agreement of all named and unnamed inventors must be filed. See M.P.E.P. § 1481.02 describing the differences between 35 U.S.C. § 256 and 35 U.S.C. § 116. Assignee cannot yet determine if there is a need to correct inventorship and, if a need to correct inventorship is determined, Assignee cannot estimate the likelihood that all parties will agree. Correction of inventorship through reissue is not only a lengthy process, but also under 35 U.S.C. § 251, admission must be made that the patent is wholly or partly inoperative or invalid, which may be an unnecessarily prejudicial statement. Similarly, seeking correction of inventorship through litigation instituted after issuance of the patent can be drawn out and costly. In that regard, Assignee notes that claimants Pei-Herng Hor and Ru-Ling Meng are employees of the University, but due to the potential for conflict, attorneys for the University are adverse to the claimants. Thus, the claimants must seek their own counsel.

Finally, the claims of this patent application are directed to superconductive compositions, which are to be accorded "special status" under M.P.E.P. § 708.02 IX. While this provision is directed to accelerating the processing of patent applications, it is also directed to the "adjudication of disputes involving superconductivity technologies. . ." Therefore, special status should be afforded this application.

In view of the extraordinary timing of this claim, the interest of the Assignee in having this patent application issue after investigation of this inventorship dispute, and the interest of the public in patents directed to superconductive material, Assignee submits that justice requires that the application be withdrawn from issue, and held in abeyance or suspension for a reasonable period to allow Assignee to conduct an investigation and make necessary corrections, if any, to inventorship.

Petition to Suspend the Rules

A fee as required in 37 C.F.R. § 1.17(f) is enclosed.

Respectfully submitted,
